## ROAD BUILDING

GOOD WORK OF A ROAD DRAG

Implement Should Be Used Properly at  
Right Time—Repair All Ruts and  
Depressions.

After two days of rain, says a writer in Hoard's Dairyman, we took an eight-mile drive out into the country to buy some pigs. One piece of road was like a city boulevard, only better. Despite its being only a gravel road there was little mud or water, and one would have thought that there had been only rain enough to settle the dust instead of the big rainstorm. We inquired and found that two neighbors had made it a practice to alternate in going over this road with a road drag after every rain. Just beyond, we came to a piece of road muddy, slippery and full of chuck holes that sent us up a mile for every mile covered.

The only difference between these two pieces of road was a road drag and an hour's time spent when field work could not be done. We estimate that it took twice as much gasoline to cover the undrugged road. Multiply our experience by the dozens of teams and autos going over this muddy road, and then compute the expense of failure to use the road drag that was doubtless rotting away in some fence corner.

We do not now have in mind the demands of the good roads extremist, but are considering what may be done and what should be done with the common dirt road. It does more harm than good, as a general rule, to plow up the sod on the sides of the traveled track and pile it up in big lumps in the center of the track, leaving them there to be broken up by passing vehicles, and the loosened dirt washed away by the rain or blown away by the wind. Keep all the sod, grass roots and other

Perspective View of Split-Log Drag.

trash out of the road bed. It merely decays and makes ready for a splendid hole to form.

Whatever is worth doing at all is worth doing well. No part of a repaired highway should be left until its surface has been thoroughly and evenly compacted and shaped to let all the water run off. And when, as will most always happen, ruts and depressions make their appearance, they should be smoothed down, filled, and well compacted so that water may not remain in them to soften the ground and permit further damage by the traffic.

When using the road drag, use it properly at the right time. Don't go out when the road is too wet or too dry. Take it when the mud will make a good mortar and will puddle down like the little girl's mud cakes or the mason's mortar.

## MACADAM ROAD PROVED BEST

There Are Several Varieties, Chosen to Suit Localities and Circumstances Everywhere.

For over a century now the macadam road has been in use and has proved itself to be the best all-around road that can be built. In fact, so good is it that all military roads in the war area in France are of this type. There are several varieties of it, changed to suit localities and circumstances. The regular water-bound macadam is, without doubt, the best and safest for horses. But we cannot build for horses alone, it is necessary to provide the broken stone road against the automobile tires, otherwise the road surface would soon go to pieces.

**Inadequate Roads Costly.**  
Both town and country lose money because of our very inadequate roads.

**Rape Good Hog Pasture.**  
Rape is a profitable crop for providing fall pasture for hogs when farmers harvest corn by hogging it down.

**Break Land Before Freezes.**  
It will pay generally to break the land before freezes so the weeds and other vegetation may be killed while the ground is still soft.

## FARM POULTRY

### PREPARE HOUSE FOR WINTER

Fowls Withstand Cold Air Much Better Than Impure—Ventilation of Much Importance.

(Prepared by the United States Department of Agriculture.)

Hens can withstand cold air much better than impure air. Don't shut the poultry house up tight at night to keep out the cold unless ventilation is provided. Hens will thrive better—and lay more eggs—if they have plenty of pure air; not draughts. It is as necessary to fowls as clean water and good food.

When hens are confined in badly ventilated houses, as is sometimes the case in cold weather, they lose vitality, produce fewer eggs, and often become sick and stop laying. Good ventilation is needed also to keep the house dry. In cold weather moisture collects on the walls and roof in a poorly ventilated house, making it very uncomfortable for the poultry to live in. When the temperature rises this moisture trickles down saturating the air and making the litter on the floor wet.

If the house is not overcrowded and is insufficiently ventilated for only a day in cold weather, no great harm is done. In an overcrowded house conditions become insanitary in a few hours. Even in a house properly stocked conditions at the end of one day of impure air are noticeably bad, and unless promptly corrected, grow steadily worse.

Ventilation to provide pure air and dryness in a poultry house is simply a matter of keeping doors and windows open as much as is necessary to keep the walls dry. Few poultry keepers have any difficulty in this until the temperature goes low enough to freeze water in the house. Then the tendency is to close doors and windows to keep the house warm.

This is the right idea, subject to the practical limitation that the house must not be closed so tight that the supply of fresh air is insufficient, and the circulation of air is retarded to such an extent that moisture collects on the walls. The proper regulation of ventilation insures pure air and dryness, and keeps the house as warm as is practicable without the use of artificial heat, or special provision to absorb an excess of moisture. The adjustment of doors and windows to provide the conditions required must be learned by observation.

The general rule is to open doors and windows as much as is necessary to keep the house dry in cold weather, and to keep them wide open when water in the house will not freeze.

Cheap cotton cloth and common burlap are often used in some of the windows of a poultry house in place of glass. Cotton cloth is to be preferred for this purpose because it is cleaner and admits more light. When both cloth and glass windows are used the

Inexpensive Poultry House With Plenty of Open Space in Front.

most common practice in cold weather is to keep the glass windows closed all the time; to open the cloth window wide on clear days and close it as much as seems necessary at night and on stormy days. When the winters are generally mild cotton cloth is sometimes used in all windows.

Usually a house can be run with a good deal of ventilation in all but the very coldest weather. Birds can stand quite low temperatures provided their embryos do not get frosted. Where there is much hard freezing weather the most effective way that has been found to keep a poultry house warm and dry is to place dry straw or hay, to the depth of a foot or more, overhead on a floor of boards laid as wide apart as may be and still hold the straw.

Dry straw will usually absorb all moisture, and so when it is used the poultry keeper must judge by the air in the house how much to keep doors and windows open. A breed that will not stand the temperature when ventilation is regulated in this way is not suited to the climate.

### Use for Waste Products.

Full use should be made of waste products from the kitchen, the table and the farm on the farm range, for such material is excellent food for all kinds of poultry and will help to cut down the expense of feeding.

### Enemy of Young Chicks.

Lice are the worst enemy to the young chicks, and hot weather tends to increase their numbers unless drastic measures are taken to get rid of them.

GREEN-FORD AUTO CO  
Agents Greenville, Ky.

You know, of course, that the Maxwell Motor Car is the long distance champion of the world.

You have read that a "stock" Maxwell 5-passenger car ran for 44 days and nights without stopping the motor.

And that, in the 44 days non-stop test, the Maxwell covered 22,022 miles, at an average speed of 25 miles per hour.

But have you, up to now, realized the full significance of that performance?

Do you know that no other motor car in the world has ever equalled or even approached that performance?

In a word, did you take this test seriously when you heard of it?

Or did you set it down as a "selling stunt" to give the publicity man something to talk about?

It's worth your while to read and to study the conditions under which that test was made.

You know that the American Automobile Association (familiarly known as the "A. A. A.") is the official arbiter of every automobile test and contest.

But perhaps you didn't know that when a maker places his product under A. A. A. supervision he must do absolutely as told and abide by the decisions of the Board. That's why there are so few A. A. A. Official Records!

This 22,000-mile Maxwell non-stop test was official from start to finish.

Therein lies its value to you.

It proves absolutely the quality of the car—of the very Maxwell you buy.

For verily this was a "stock" Maxwell. Listen:—

First: the inspectors disassembled the motor to see that no special pistons, valves, bearing-metal or other parts had been used.

Every other unit was as critically inspected. Then the car was re-assembled under their own supervision.

As we had much at stake and the test was made in winter (November 23 to January 5) we asked permission to take certain little precautions against accidental stoppage.

Sounds reasonable, doesn't it?

But they refused permission to do any such thing.

For example, they wouldn't let a rubber cover over the magneto—it wasn't "stock."

They refused to let us tape the ignition wire terminals—they are not taped on the Maxwells we sell—so of course it wasn't "stock."

Neither would they let us use a spiral coiled pipe in place of the usual straight one from tank to carburetor to guard against a breakage from the constant, unremitting vibration—it isn't "stock."

Nor to use a special high priced foreign make of spark plug—the run was made on the same spark plugs with which all Maxwells are equipped.

So rigid were the rules, we were unable to carry a spare tire on the rear—it wasn't "stock." A telegram to headquarters in New York finally brought a special permit to carry a spare tire.

"It isn't stock!" "It isn't stock!"

That was the laconic reply of those A. A. A. inspectors to every last suggestion that called for anything but the precise condition of the standard, stock model Maxwell that any customer can buy from any one of 3000 dealers anywhere.

We are glad now—mighty glad—that the rules were so strict and so rigidly enforced.

Any other car that ever attempts to equal that record must do it under official supervision—and comply with the same terms.

And it will have to go some.

For Maxwell set the standard when it performed this wonderful feat.

Maxwell complied with those rules—and made good.

Every drop of gasoline and oil and water was measured out and poured in by the inspectors themselves. They would not even let our man pour it in!

Every four hours the car had to report at the official station for checking.

And it had to be there on the minute.

And every minute there was an inspector beside the driver on the front seat—two more men in the rear. One got out only to let another in—day and night for 44 days and nights!

There was one technical stop.

It is interesting to know the circumstances.

Dead of night—a driving storm—a cloudburst—suddenly another car appeared in the road ahead.

In his effort to avoid a collision the Maxwell driver stalled his motor.

At least the observers thought it stopped and so reported.

The car did not stop, however, so its momentum again started the motor (if it had indeed stalled) when the clutch was let in.

The contest board exonerated our driver on grounds that his action was necessary to save life.

That shows you how rigid were the rules—how conscientiously applied by the observers.

You who have owned and driven motor cars—you who know how small a thing may clog a carburetor or a feed pipe; "short" a spark or stall a motor—will realize what a wonderfully well made car this must be to go through that test under those conditions—44 days—22,022 miles without stopping.

The exact amount of gasoline, of oil, of water used; the tire mileage, tire troubles, tire changes; the distance and the routes are matters of official record, attested under oath and guaranteed by the A. A. A.

(By the way, the average was nearly 10,000 miles per tire.)

Any Maxwell owner—or anyone interested may see those records.

And—here's the most wonderful part—though no attempt was or could be made foreconomy; the Maxwell averaged 22 miles per gallon of gasoline.

Some other car may, some time, equal someone of those performances. But to equal them all in the same test—that car must be a Maxwell.

# THE RECORD

An Independent Newspaper.

PUBLISHED THURSDAY BY

RECORD PRESS,

JOHN L. ROARK, EDITOR.

Long-Distance Telephone, No. 72.

Office in Annex near Roark store, ground floor.

50 CENTS PER YEAR, IN ADVANCE.

TERMS.

The subscription price of the paper is payable in advance, and when the time has expired, it will be paid, the paper will be stopped.

Cards of thanks, obituary notices, etc., if not longer than ten lines, will be published free. A charge of five per line will be made for success stories. No variation of this rule to anyone.

Free sample copies will be mailed.

Advertisements will be inserted. A rate card will be furnished on request.

Address all communications and make all remittances payable to RECORD PRESS, Greenville, Ky.

THURSDAY, NOVEMBER 28, 1918.

Entered at the Greenville, Ky., postoffice as second-class matter.

"We Must Make Sacrifices in order to win the war."

—WOODROW WILSON.

... This paper has enlisted with the government in the cause of America for the period of the war ...

It appears that the ex kaiser has no place to go but home—and no home.

From the adopted prohibition so that if any other Ponce de Leon go further seeking the fountain of youth they will not be fooled by a chance bar.

GERMAN propaganda is not out of business as a result of the war. Indeed it is more active than ever, trying to give Germany the victory in the peace conference that it could not win on the battle field.

If the central powers have any discretion left they will welcome the demand for a rapid demobilization of their armies. Armed men with families demanding bread are dangerous to tottering governments.

Victrola And Records Free to Some School.

The J. L. Roark Estate, county distributors of Victrolas and records, has offered a Victrola and twenty selections in records to the rural school showing the highest percentage in attendance this school year. There are quite a number of schools in the county using the Victrola, and more teachers are planning to do so. If any district buys a machine, and later it develops wins the prize, the amount paid will be refunded, up to the amount offered, but schools which have heretofore secured a machine will not be permitted to compete. Getting the pupils' attention school is one of the greatest needs of the day, and it is thought this prize will make the teachers even more active than they have been along this line. No town or village school are allowed to compete, the offer being confined to rural schools, and as the award is to be made on a percentage basis, the smallest district in the county has an equal chance with the larger. The announcement was made to the teachers at a justly recent, and was received with enthusiasm.

If you do not have music in your home, you have no foundation on which so many other vital things must rest. Get ALL music, as well as the best in literature, on the Victrola. Roark county distributor, has placed more than 250 instruments in the county, and his easy terms will enable anyone to own a machine.

## Message to Music Lovers.

It is a brave man who will try to dispute the verdict of Galli-Curci, Hietfeld, Caruso, McCormack, Farrar, Gluck and scores of other supreme judges. This verdict is that the Victrola is far superior to all other instruments, and the only one worthy of recording their art. Secure a Victrola now, and enjoy the artistry of the greatest singers and playing organizations of the whole world, right in your home. Call at Roark's and see the Victrola and have demonstrations.

Buy a Victrola now, and save the ten per cent. war tax. Roark has a large supply of instruments just now, and invites your visits.

## Notice to Drafted Men.

On and after October 8th, 1918, all cases coming before the District Exemption Board, Division No. 2, Western District, at Madisonville, Kentucky, either for classification or on motion to reopen will be heard and tried only on affidavits filed with the Board. No witnesses, unless summoned by the Board, will be allowed to appear before the Board either in person or by attorney after said date.

Sept. 24th, 1918.

Wm. H. Vost,

Chairman.

Latest millinery for young and old at Simmons shop.

Do your Christmas shopping early. Roark has already sold two Victrolas for holiday remembrances.

## Home And Lot For Sale.

6-room house, 2 1/2 acres land, 2 wells and cisterns, barn and outbuildings, on W. Main cross street, for sale. Also a lot of mill slabs, delivered in town, at \$1.50 per load.

J. N. Clemmons.

Davenetts at less prices and better upholstery at Roark's.

In view of conditions which now exist, and with the outlook for better not in the least encouraging, so far as output is concerned, you should arrange at once with Roark for your Victrola, for it is a sure thing that the demand will continue to increase.

Bought for one, enjoyed by all—that's the Victrola.

## Used Machines For Sale.

Roark has a number of used sewing machines of different makes, taken in exchange for the White rotary, which will be sold very cheap. These machines have all been overhauled, are in good condition, and should be seen.

See the velvets, georgette crepes, satins etc, on display at the Simmons shop.

Get typewriter ribbons at this office.

## Announcement.

Select your Victrola for Christmas now. We planned months ago so that you may have assurance of an instrument if you arrange now for it. Stocks are low, all over the country, as the demand has increased vastly over any previous period, and with scarcity of labor and lessened material supply at the factory, the usual shortage of Victrolas at holiday times will be more acute this year than heretofore. Select your instrument and have delivery made when you wish.

The J. L. Roark Estate.

## Magazine Vote Approves Victrola

Just recently one of the leading magazines conducted a straw vote among its readers, located all over the country, to find out how many of them had a talking machine of any kind, and how their preference ran. Out of the 240 responses received, 132 gave the Victrola as the one they chose. There were 12 different machines in the list.

## "Rody" To Sing In France.

Homer Rodebaugh has gone to teach Pershing's boys how to sing "Brighten the Corner Where You Are." Escorting his celebrated old trombone, wearing the Y. M. C. A. uniform, Billy Sunday's chorus master will be a soldier song leader for the duration of the war. "Rody" is to specialize in the one song he made especially famous, but plans to dispense other, non-evangelistic successes such as "The Last Long Mile" and "Good Morning Mr. Zip Zip Zip."

Sure should be useful gifts this year.

## It Never Happened Before.

Ever since the Victor Talking Machine Co has been in business—20 years—there has been issued a monthly list of new records. But for December there will not be a new record put out. Instead, the company has for some time been arranging a list of some sixty records selected because of strong demand from its many thousands, and has been operating its entire pressing plant for a month on these numbers, many of which we have not been able to procure for months. We have bought heavily from this list, and with confidence invite the visits of the trade, as our record stock now consists of over 2,000 records, and is in better balance and variety than we have ever been able to reach. Victrolas ordered many months ago are just now being received, and we are in excellent position to care for regular and holiday trade.

The J. L. Roark Estate.

## Bronchitis.

Bronchitis, or "cold on the chest" is an inflammation of the mucous membrane that lines the larger bronchial tubes. Inflammation of the fine tubes in the lungs is distinguished as capillary bronchitis, or bronchopneumonia. The disease attacks young or old, sick or well, just as a cold in the head does; indeed, it is virtually the same: a cold in the head is a catarrhal inflammation of the mucous membranes of the nose; bronchitis is a catarrhal inflammation of the bronchial tubes.

The causes of bronchitis are varied, but the commonest is exposure to cold and wet when the general bodily condition is below par as a result of fatigue, mental anxiety, or a previous illness. Irritation from inhaling dust, smoke or powerful vapors is another prolific cause of bronchitis. It may also come on in the course of a debilitating disease, such as diabetes, chronic cough, Bright's disease, or the acute eruptive fevers of childhood. It is a germ disease, but, unlike typhoid fever or diphtheria, is not caused by a special germ; there are a number of microbes that cause bronchitis.

The disease may be very mild, and marked only by a cough for a few days, or it may be so severe as to threaten or even take life, sometimes in a few days, or a week or two; sometimes it becomes chronic and persists for weeks or months, or for the rest of life.

It begins usually as an ordinary cold, with sneezing, chilly sensations, and a little soreness of the chest accompanied by a cough. In severe cases there is considerable fever, but in mild attacks the increase in temperature is very slight, or absent. The patient may suffer from shortness of breath, but that occurs only when the inflammation affects the finer bronchial tubes. It is not difficult to recognize the disease—the patient himself makes his own diagnosis—but error sometimes occurs when a cough that is really the beginning of whooping cough or one of the early symptoms of typhoid fever is thought to be an indication of bronchitis; or when the cough of tuberculosis is regarded as nothing more than chronic bronchitis.

The treatment of mild bronchitis is simple—indeed, the disease will generally disappear entirely if the patient will remain in bed, or at least in the house, for a few days, eat simple food and drink plenty of water. A hot foot bath, a turpentine or mustard plaster on the chest and an aperient are all of use to hasten the cure.

Roark will be glad to give you labels for all your Christmas packages.

**A word to us today—and your home can have a Victrola for Christmas**

But we ask you not to delay any longer. The whole world seems to want Victrolas this Christmas and the people who wait until the last minute will find that all the Victrolas have been "gobbled up."

By acting today you can take advantage of our complete assortment of Victrola styles at \$25, \$40, \$50, \$75, \$100, \$150, \$200, and \$300. However, you need give scarcely a thought to the money end of it. We appreciate that Christmas empties the fullest of purses, and our terms are such as to inconvenience no one.

Call on us today and arrange to have your Victrola delivered—say Christmas Eve.

**ROARK**

**Thanksgiving**

This should be the happiest Thanksgiving that the people of the world have ever participated in, and we sincerely hope this Thanksgiving finds you so blessed. Around this time our minds invariably picture big turkeys, big pumpkins, and a bountiful harvest generally. The spirit of the season prompts us to thank you for the business given us in the past, and to tell you we will have everything good to eat for the big dinner.

**W. H. Brizendine & Co.**

**The Telephone's Part**

Scattered all over the country are great camps where officers are being trained, recruits whipped into fighting shape, aviators and artillerymen schooled in their special arts, and non-combatant forces instructed.

Along the coasts and on the lakes the forces of the Navy are just as busy, preparing to throw the nation's full strength against the foe.

In the foreground of all this activity is the Bell Telephone, linking even the farthest outposts, with headquarters and bringing all under direct central control. Thousands of miles of new lines have been constructed, hundreds of switchboards installed, and unheard-of volumes of traffic, both from government and private sources, are being handled.

While it is now practically impossible to secure the badly needed additional equipment to take care of the abnormal increase in telephone calls, our engineers are applying all the remedies known to science and are adopting every means at their command to equalize the load on each switchboard so that no particular subscriber will suffer serious inconvenience.

We appreciate the problem before us and realize the service will probably be slowed down during the coming months. We want you also to understand the situation and to know that the operators are serving you cheerfully and to the extent of their ability under difficulties for which there is no immediate remedy.

#### Local Mention.

We are thankful.

Take a vacation today.

All the blessings of the day to you.

Fresh meat is now being offered plentifully, and the price is, too.

Potatoes, turnips, cabbage are general vegetables these days.

Pumpkins are on the market, at fair prices, and the demand is good.

Typewriter ribbons, all makes at The Record Office.

Good morning! May this be a day of rest and recreation.

Mechanics are very busy, these days, getting ready for the holidays.

New sugar allowances will permit home-made candy for Christmas.

Roark for pianos, Victrolas, records, cabinets.

The Kentucky Utilities Co. is now buying water, instead of selling it.

Old hats remodeled at the Simmons shop.

Our home boys who have been soldiering in camp will soon be home.

Turkey, oysters, cranberries, fruits, nuts, have all been on heavy call, to prepare today's dinners.

Two models, No. 4 and 6 Victrolas, have advanced to \$25 and \$35, each, a raise of \$2.50.

New corn is not being offered, and old corn is scarce, on this market.

Many markets are bare, but water is about as much sought as anything here.

Get asbestos table mats from Roark.

Christmas is always an event that nobody has to wait upon—except the children.

Get in line for your Christmas Victrola, for selections are being made rapidly at Roark's.

One of our friends complains that we never did make war on Turkey. Well, we will do that today.

Let E. N. Martin help you save by putting and keeping your clothes in good condition, and save you the expense of high priced outfits now.

When the German soldiers marched back home it is said that their song had been changed to "Alles Ueber Deutschland."

From reports of the War Department it has been learned that none of our selected draft boys from town were engaged in any of the fighting in France, but were fully trained and were moving to the front lines when the armistice was signed.

Trade at home—it helps all of us.

Hustle, the year is nearly gone.

Major Influenza is still on the job so you had best watch out.

This is the day and this is the way we should observe our victory.

May we all have a good, sensible thankful day.

Good morning! Know the health authorities think flu danger is past?

The election is almost as remote a memory as the war.

Mr. G. M. York was here from Central City with the court crowd Monday.

Look and listen, but do not stop, if you are intending to do Christmas shopping.

Dr. Liggett T. Baily was her from Madisonville on professional call the first of the week.

Messrs Morrill Bennet and Duncan Stevens were home from Camp Taylor for the week-end.

Paint your roofs and fix your chimneys, flues and stove pipes, before winter arrives.

Conversion of plants engaged in war work will bring about conditions for our betterment.

Dozens of new and old proven popular records received Tuesday by Roark.

Now as the warring nations are arranging to settle up, it is to be hoped that prices on many items will settle down.

Our boys over there will be thankful, for their folks back here have made their comfort sure by over subscribing the War Work fund.

Free labels for your Christmas packages will be supplied gladly by Roark.

The ban on account of the influenza epidemic has been lifted, but it will still pay you to be careful in your habits, if you value your health.

Shop now for Christmas—shop here for Christmas. Roark.

Now that millions of our people have enjoyed the benefits and delights of a war garden, do you suppose they will quit, just because the war is over?

Large stock of mirrors at Roark's Small prices.

Pumpkins are so plentiful around Kuttawa that they are being offered free to anyone who will take them. One of our citizens was there this week, and accepted a gunny sack full.

The December Victor records are not new, but have been selected from productions of years past, and have approval of the public. Call at Roark's and hear what is offered.

The big munitions plants of the country are already turning to arranged plans for making articles of peace, and are working as hard as they did on destructive items.

The tones on a Victrola spring and mingle as on no other instrument. The light weight on the needle does away with the gritty, grabby, scratchy noise so manifest on all other machines, and insures the supreme delights of music, song and story. See and hear at Roark's.

We should be thankful because it might have been much worse.

Get your holiday shopping on the top of the list, or you will disappoint somebody.

The flu ban is lifted in Muhlenberg but the people have not been able to rise to any great height.

Farmers are developing and diversifying, and have doubtless gained more pointers from the war than anybody.

Learn Gregg shorthand and touch typewriting by taking lessons three nights each week. Call phone 197 after 6 p. m., for information.

Muhlenberg boys in France will be remembered by relatives this Christmas, as many packages have been sent them the past ten days.

Miss Epps Huddleston, who has been here on a visit to relatives, returned the first of the week to her home in Murfreesboro, Tenn.

Pork killing has been quite an industry the past week, and spare ribs, souse and sausage are plentiful—we suppose.

Examine the line of "Restgood" all-hair mattresses at Roark's. Finest line of goods ever carried in this section, and the cheapest, for one will give perfect satisfaction for an ordinary lifetime. Pillows of same material.

The W. C. T. U. of Muhlenberg served dinner yesterday at noon to the inmates of the poor farm, and it is doubtful if the recipients had the same joy as those who served.

Nothing can express your wishes in a gift as will a Victrola, and no gift could be more appreciated. See Roark, have demonstration and make selection.

There was a fair crowd here Monday to court, but farmers are extremely busy, gathering in crops, and many of them did not come to town. Shopkeepers were busy as most visitors were shoppers.

If you have some one you wish to surprise at Christmas, we shall be glad to help you make it as lasting and pleasing as possible. We have a gratifying list of customers for holidays, and wish to have you. Roark.

Merchants of Greenville are wide-awake and seeking increased business. Trade with them in confident assurance of best goods at lowest prices.

Now On Peace Basis

The Victor Talking Machine Co. for the past year and a half has been devoting at least half its activities to important war work. They built new factories, added vast equipment and expanded their facilities to do their part in helping win the war. Now that peace is assured, these developed additions will be employed in making Victrolas and records, and in a few months it is hoped to regain a service that is normal, at least.

We will pay a straight salary of \$35.00 per week for man with rig to introduce Eureka Egg Producer. Six months contract. Write quick. Eureka Mfg. Co. East St. Louis, Ill.

Telephone No. 72, Greenville

and make reservation of that Victrola you want for Christmas, and Roark has for you.

Louisville is to have a great community Thanksgiving service today, with Jew and Gentile, Catholic and Protestant, mingling in their praises and prayers. This is as it should be, and will be, from now on, to a greater extent than ever before.

The 500 Victrola owners in Muhlenberg county, as well as owners of all other machines, are especially invited to inspect the stock of more than 2,000 Victor records at Roark's.

Elsewhere will be found the statement of the First National Bank, and it is good reading, since it shows a most gratifying condition of affairs in the county which it serves.

Talking machine owners will find at Roark's the greatest stock of records in this section.

Let music provide the feast for Christmas and every day of the year and nothing can supply this like a Victrola, for the talent of the world is yours to command. See Roark and have demonstration.

Pointed Paragraphs.

When a man wants a cigar he never wants it bad.

Half a loaf is better than the average railroad sandwich.

In the human barometer smiles mean sunshine and frowns mean frost.

No matter how early the bargain counter clerk comes in he can't avoid the rush.

The woman who thinks all men are angels had better remain single and nurse the delusion.

When a man speculates on a large scale he always has something on which to weigh the consequences.

History repeats itself—with the exception of your own private history, which is repeated by your neighbors.

There is no parting so bitter as the parting of a quinine capsule just as you are in the act of swallowing it.

After a man succeeds in printing one kiss upon a girl's lips it's an easy matter to run off a large edition.

This Town Beats City

A customer who could not get from Roark the particular type Victrola he wished, happened in one of our neighboring cities a few days ago, and thought he would see what he could secure. This city is several times as large as Greenville, but the Victrola dealer did not have even one Victrola, though he had a large number of instruments of another make for which he also had the agency. Roark has a larger stock of Victrolas and records than any dealer hereabouts, and is in splendid position to care for the trade.

(Get typewriter ribbons at this office.)

## ROARK, Victrolas, Records, Cabinets

GREATER than the Metropolitan Opera House; greater than Covent Garden, where the royalty of England is entertained; greater than La Scala at Milan, the Grand Opera House of Paris, and the Royal Opera of Berlin; greater in fact than all the opera houses and places of entertainment in the world, is the seventh floor of Building No. 5—the centre of a city in itself formed by the modern structures of steel and concrete that house the giant industry of the Victor and Victor-Victrola.

To this building in the city of Camden, just across the historic Delaware River from the city of Philadelphia, comes a never-ending procession of the very greatest artists in the whole world. Today it may be Caruso or Amato, and tomorrow it may be Melba, or Trazzini, or Schumann-Heink, or Farrar; or it may be several of them assembling to unite in making a masterpiece like the "Sextette from Lucia." Or it may be Paderewski, or Kubelik, or Elman, or Harry Lauder, or Blanche Ring; and then again it might be Sousa and his band, or Victor Herbert and his orchestra.

But whoever it is or whatever the organization, rest assured that within the four walls of this building is heard, day in and day out, year in and year out, music in all its forms such as no other place on earth has ever heard.

And unlike music that is heard in any other place, which is only a momentary pleasure ending with its rendition, Victor music lives forever. From its beginning in Building No. 5, it goes through the various processes necessary to its perpetuation and eventually leaves the shipping department (Buildings Nos. 9 and 10) to be heard again and again in hundreds of thousands of homes, just as it is heard in the sacred precincts of the recording room on the seventh floor of Building No. 5.

You can hear some of this exquisite music today. Come in and we'll gladly play your favorite selections. Victrolas \$10 to \$100. Victor-Victrolas \$15 to \$300. Terms to suit your convenience.

# POULTRY FACTS

## BREEDING OF FANCY FOWLS

Practice Results in More or Less General Improvement of Poultry—Some Suggestions.

(From the United States Department of Agriculture.)

There should not be any discouragement of the breeding of what is ordinarily known as fancy poultry. That term is usually applied to the standard breeds as kept by specialists who produce exhibition birds. That practice has always resulted in more or less general improvement of poultry and should continue to perform just that function at this time when the wider keeping of a better grade of poultry stock cannot fail to result in an increased production. The work of the poultry specialist also gives encouragement to the general farmer and the backyard poultry keeper to take better care of the flocks. The continuance of poultry exhibitions, maintained almost wholly by the poultry specialist, is certainly justified during the present emergency. It has always been the breeders of exhibition fowls who have been the leaders in promoting the welfare of the poultry industry, and these men have been especially willing to give their time and efforts in working for increased production. The poultry shows themselves afford an opportunity for interesting individuals in poultry keeping and have served as effective centers from which to launch and extend the campaign for increasing poultry production.

To the specialist in poultry production it is not necessary to say in this connection anything with regard to breeds that should be used, but to the general farmer some suggestions about that line might be of assistance in making the adjustment to changed conditions.

Standard poultry, as the phrase is commonly used in America, is poultry bred to the standards established by the American Poultry association. The object of making standards for poultry is the same as the object of making standards of weight, volume or quality for any product or commodity; to secure uniformity and establish a series of grades as a basis of trading in the article.

In making standards for poultry and in the process of production, the principal points considered are size, shape and color.

Size and shape are based characters and largely determine the practical value of poultry. Many standard breeds are divided into varieties differing in color but identical in every other respect. Color is not a primary utility point, but a secondary point often comes in for special consideration. For example, a white variety and a black variety of the same breed are

White Plymouth Rock Cock, First Prize Winner.

actually identical in table quality, but because black birds do not dress for the market as clean and nice looking as white ones, it often happens that they are not as salable.

When a flock of fowls is kept for production only, uniformity in color is much less important than approximate uniformity in size and type, yet the more attractive appearance of a flock of birds of the same color justifies selection for color as far as it can be followed without sacrificing any material point.

When a poultry keeper grows his own stock year after year he should by all means use stock of a well-established popular standard breed. By doing so and by selecting as breeders only the best of the best specimens of the flock as are needed to produce the desired result each year, a poultry keeper maintains in his flock a highly desirable uniformity of excellence in every practical quality and, with little extra care and no extra cost, can have a pleasing uniformity in color. To the novice in poultry keeping it often appears that there is no need of uniformity for so many breeds and varieties as have been standardized in America. Further acquaintance with these breeders shows that although color differences are in most cases merely to please the eyes, persons having different preferences for color, the differences in shape and size which make breed character have been developed with a view to adapting each in particular to particular conditions.

Roark, Greenville Ky.

# IOWA DOES GOOD ROAD WORK

Lincoln Highway Official Is Pleased With Progress—Each County Preparing to Aid.

That good work is being done in the improvement of the Lincoln highway through Iowa is the assertion of H. C. Ostermann, field secretary of the Lincoln Highway association. Mr. Ostermann recently made a trip of inspection through the Hawkeye state and the results were more than satisfactory to him.

On his journey across the state the Lincoln highway official was accompanied by D. E. Goodell of Tama, Ia., state consul of the Lincoln Highway association, and Thomas H. MacDonnell, J. W. Hohen and H. C. Board of the Iowa state highway commission.

Enthusiastic and well-attended Lincoln highway meetings were held at numerous points across the state; a splendid program of Lincoln highway improvement was revealed by the reports submitted at these meetings. Covering the most important developments, Mr. Ostermann states: "Seventeen miles of the Lincoln highway in Clinton county have already been graveled with federal aid funds; applications for federal aid funds have also been made by Cedar and Pottawattomie counties, and similar applications will be filed in the immediate future by Linn, Tama, Benton and probably Crawford counties." A Lincoln highway seedling mile is now under way in Linn county, and existing arrangements call for the complete graveing of all the rest of the Lincoln highway in the county. In a similar fashion the plans in Marshall county call for the graveing of every foot of the Lincoln highway from county line to county line. Story, Boone and Greene counties are practically all graveled at the present time and an all-weather road is reported.

The visiting officials found that Crawford county had spent more money than any other county in the state in graveing the Lincoln highway. Field Secretary Ostermann and State Consul Goodell expect that by

Good Stretch of Road in Iowa.

the end of 1918 there will be 1,000 substantial members of the Lincoln Highway association in Iowa.

Plans for the permanent marking of the route across the state were discussed with the various local officials, and consuls of the national association, and each county in the state is preparing to aid in financing this project to the extent of \$300. A start has been made in this direction, following the action of Pottawattomie county in voting \$200 for this purpose, to which the city of Council Bluffs has added \$100.

The importance of the Lincoln highway improvement in Iowa was attested by the presence and interest of State Engineer MacDonald and his associates at the various meetings.

## REPAIRS NEEDED FOR ROADS

Necessity and Desirability of Eliminating Holes and Ruts Should Be Brought Out.

In order that the roads may not be entirely destroyed or put into a condition requiring complete rehabilitation, the government ought to impress upon states, counties, cities, villages and townships the necessity and desirability of eliminating every mudhole, every depression, by filling in; it should ask that culverts and bridges be kept in a reasonable state of repair and it should command that every highway should regularly and systematically be cleaned after every rain, that high spots may be eliminated, low spots filled and the roads made as smooth and safe as possible with this temporary scheme to aid, as far as possible, transportation over public highways.—Pitt and Quarry.

Stand Heavy Motor Traffic.

It is perfectly possible to build roads which will stand up under the heaviest motor traffic, as the state of Connecticut has amply proved.

Road Builders Are Made. Road builders are seldom born, but are made and trained largely at public expense. You either pay for the trained man or you pay to train one.

Cry Everywhere for Roads. There is everywhere the cry for roads, and for better roads.

Roark, Greenville Ky.

# LIVE STOCK

## SELECT HOGS FOR BREEDING

Mis mating Will Not Only Give Unsatisfactory Results, but Likely to Discourage Beginner.

(Prepared by the United States Department of Agriculture.)

Influence of the sow upon the offspring is just as great as that of the male. Mis mating or a poor sow will not only give unsatisfactory results in breeding, but it will likely discourage the beginning breeder. This latter fact would be especially true of a youth carrying on a home project with swine.

If possible, secure a pure-bred animal of a good strain. The forehead should be broad, the throat clean and trim, the neck moderately thin, the shoulders smooth and deep, the back wide and straight, the chest wide and

A Good Type of Brood Sow With Her Family.

deep, sides straight and deep, the body long and capacious, pelvic region broad and well developed, legs straight and moderately short, and a generally refined appearance; yet over refinement may indicate a delicate constitution.

If a number of brood sows are to be used they should be uniform in type. This is necessary to secure a uniform lot of pigs. It is very unsatisfactory and unprofitable in breeding to have litters of pigs varying in appearance and lacking uniformity. To insure a uniform result it is advisable to select from a well-established strain of hogs.

As was indicated in the case of the sow, both parents have practically the same influence on the quality of the offspring; however, the male has the greater influence on the entire herd, since every pig is sired by the male, whereas all pigs do not have the same dam.

While too much stress cannot be placed on the importance of the sow, if possible the male should be superior to the sow. Regardless of the type of the sow, a poor male should never be used.

Secure a pure-bred animal of a good strain. The masculine characteristics should be strongly developed, especially in the head and neck; the back should be broad, straight and deeply fleshed; sides deep and long; quarters well developed; legs straight and strong. The animal should stand well on its toes.

Over refined sows should be mated to rather masculine males, and coarse sows should be mated to males of high quality indicated by fine bone, skin and hair.

## IS HOG WALLOW DANGEROUS?

If Concrete Structures Are Built and Kept Clean, They Have Advantages.

(Prepared by the United States Department of Agriculture.)

Some farmers favor hog wallows; others are strongly opposed to them. Filthy hog wallows are a source of danger. Hogs wallowing in or drinking contaminated water are likely to contract disease. However, there are many advantages to be derived from wallows. A cool bath is very cooling to a hog during the hot weather. It cleans the scurf from the skin and protects the hogs from flies. Crude petroleum, sufficient to form a thin layer on top of the water, may be poured into the wallow about every ten days. This will tend to keep the hogs free from lice and other skin parasites. If the skin becomes irritated from the oil, its use should be discontinued. Small quantities of coal-tar dip are sometimes added to the water in hog wallows, but there is an element of danger in this practice, as poisoning may result from the absorption of phenol by hogs which lie in the wallow more or less continuously.

On some of the larger hog farms wallows are becoming popular. The cement hog wallow should be located in a shady place and made so as to contain from eight to ten inches of water. A two-inch drain pipe, as recommended for the dipping vat, should be placed in the bottom of the wallow to permit its being cleaned out.

In many cases a farmer is not financially able to build a hog wallow or a dipping vat. If this be the case, the dip, properly diluted, can be applied with a spray pump or sprinkling can, or else rubbed on every part of the body by means of a brush or a swab of cotton waste.

Another method of controlling lice is to tie the gummy sacks or shuller coarse cloths around a post at a proper height, so that the hogs may rub against them, and saturate the sacks frequently with crude petroleum.

# STYLE XVI VICTROLA, \$225

The Aristocrat of the Victor Family

Its very appearance suggest culture and refinements—the kind of instrument you are proud to have in your home—to have your friends see—that brings you prestige and their respect.

To appreciate its individuality and wonderful tone reproducing qualities it must be seen and heard in comparison with all other models. Artistic—made from choicest woods—beautifully finished—it enters the finest homes to delight and entertain. To own one is to know complete satisfaction.

VICTROLAS, RECORDS, CABINETS, SUPPLIES  
The J. L. ROARK ESTATE  
GREENVILLE, KENTUCKY

Why children need the Victrola

It's a playmate to them. Keeps them out of mischief. Plays for them to dance or romp—or sings and tells them stories.

But it gives something greater than amusement. A Victrola in the home helps shape the spiritual and mental growth of children, helps form their characters and tastes, helps educate them. And it's a great help to every mother!

Is there a Victrola in your home? You may think you can't afford one, but we'll show you that you can. You'll say you never heard of more generous terms than ours. Victrolas \$15 to \$100. Come in today and hear yours.
